PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable web and mobile applications from scratch using React, React Native, Node.js, and modern cloud tools. Proven ability to take ownership of products, make architectural decisions, and deliver production-ready systems in fast-paced environments. Co-founder of multiple platforms including KampusHub and Byte Connect, demonstrating strong product thinking, execution, and system architecture skills.

EDUCATION

Bachelor of Science (Computer Science)	2026
<i>Federal University Wukari</i>	Wukari, Taraba State, Nigeria
Expected Year of Graduation: 2026	
Secondary School Certificate	09/2016 – 08/2022
<i>Ifako International Schools</i>	Lagos, Nigeria

CORE SKILLS

DevOps / Deployment ● ● ● ● ●	Core Programming ● ● ● ● ●
• Docker basics • CI/CD pipelines (GitHub Actions, GitLab CI) • Cloud Platforms (AWS, Vercel, Render, DigitalOcean) • Basic Linux server management • Nginx/Apache basics	• JavaScript (ES6+) • TypeScript • HTML5, CSS3 • SQL and NoSQL databases (e.g., PostgreSQL, MongoDB) • Version Control (Git, GitHub/GitLab)
Frontend Development ● ● ● ● ●	Backend Development ● ● ● ● ●
• React.js (or Next.js, Vite) • Vue.js (optional) • Tailwind CSS, Bootstrap • Responsive Design (Mobile First) • API Integration (REST, GraphQL) • Testing (Jest, React Testing Library) • HTML5, CSS3, JavaScript (ES6+) • Responsive Design	• Node.js • Express.js / NestJS • Authentication (JWT, OAuth) • RESTful APIs & GraphQL APIs • WebSockets (for real-time apps) • Database Management (Mongoose, Prisma, Sequelize) • Server-side rendering

EXPERIENCE

KampusHub — Founder

Co-Founder / Full Stack Developer

04/2026 – Present
Nigeria

- o-founded and launched a campus-focused marketplace platform for buying, selling, and running errands within university communities
- Designed and developed the full-stack system using modern technologies (React/Next.js, Node.js)
- Built core features including listings, authentication, messaging, and role-based interactions
- Led product architecture, feature prioritization, and technical decision-making
- Focused on scalability, trust systems, and real-world usability
- Successfully launched MVP and onboarded initial users

ByteConnect — Co-Founder

Co-Founder / Backend & Admin Systems Engineer

2025 – Present
Nigeria

- Co-founded a web-based platform connecting users with local service providers, artisans, and businesses
- Designed and implemented the backend architecture powering services, bookings, and platform activity
- Built and structured the admin system (frontend + backend) for managing users, services, events, and platform data
- Developed dynamic service listings and real-time data-driven features replacing static demo content
- Contributed to platform features including booking systems, community engagement modules, and service categorization
- Focused on building a scalable system to support local economic growth and youth empowerment

Flexisaf Edusoft LTD

Frontend Development Intern

09/2025 – 04/2026
Abuja, Nigeria

- Building and maintaining responsive UI components.
- Collaborating with backend teams to integrate APIs.
- Improving user experience through optimized UI design.

Federal University Wukari ICT Department

Software Development Intern

05/2023 – 10/2025
Wukari, Taraba
State, Nigeria

- Contributed to school management systems and internal tools.
- Implemented authentication and improved database structure.
- Assisted in managing and deploying university web applications.

Bincom Dev Center

Mobile App/Frontend Intern

12/2025 – 04/2026
Lagos, Nigeria

- Developing mobile applications using React Native.
- Implementing navigation, state management, and API consumption.
- Participating in team sprints, code reviews, and product testing.

Quical Concept LTD

Software Engineering Lead

01/2026 – Present
Lagos, Nigeria

PROJECTS

Eightplux — Luxury Fashion E-Commerce Platform

2025 – Present
Iagos, Nigeria

Next.js, Node.js, Tailwind CSS, Vercel

- Developed a full-stack e-commerce platform for a luxury clothing brand, focused on premium user experience and high-end product presentation
- Built a responsive, visually polished interface using Tailwind CSS to reflect brand identity and modern design standards
- Implemented product browsing, advanced search, and filtering for seamless product discovery
- Integrated secure payment systems including Paystack (fiat) and cryptocurrency payment gateway for flexible transactions
- Developed backend systems for order management, transactions, and user interactions
- Optimized performance and deployed on Vercel with a scalable and production-ready architecture
- eightplux.com

Leave Management SystemMERN Stack

MERN Stack

- Role-based authentication (Admin, Staff, Dean, Registrar).
- JWT, bcrypt, cookies for sessions.
- MongoDB + Express.js backend, React + Vite frontend.
- Status tracking, notifications, and approval workflow.

EXTRACURRICULAR ACTIVITIES

- Participated in multiple hackathons and coding bootcamps.
- Collaborated in team-based software development projects.
- Active contributor to open-source and GitHub repositories.

INTERESTS

- Building scalable tech products
- Startups and entrepreneurship
- Artificial Intelligence and system automation
- Problem solving and real-world innovation
